

IN THE CLAIMS:

What is claimed is:

1. Withdrawn.
2. Withdrawn.
3. Withdrawn.
4. Withdrawn.
5. Withdrawn.
6. Withdrawn.
7. Withdrawn.
8. Withdrawn.
9. Withdrawn.
10. Withdrawn.
11. Withdrawn.
12. Withdrawn.
13. Withdrawn.
14. Withdrawn.
15. Withdrawn.
16. Withdrawn.
17. Withdrawn.
18. Withdrawn.
19. Withdrawn.
20. Withdrawn.
21. Withdrawn.
22. Withdrawn.
23. Withdrawn.

24. (Previously Presented) A cleaning system, comprising:
a wand having a first conduit with an inlet and an outlet, and a first discharge nozzle connected to the outlet of the first conduit;
a source of high pressure water connected to the wand; and
a source of ozone/water connected to the wand.

25. (Previously Presented) The cleaning system of claim 24, wherein the source of high pressure water is connected to the first conduit for delivering the high pressure water through the first conduit and the first discharge nozzle.

26. (Previously Presented) The cleaning system of claim 24, wherein the source of ozone/water is connected to the first conduit for delivering the ozone/water through the first conduit and the first discharge nozzle.

27. (Previously Presented) The cleaning system of claim 24, further comprising a valve attached to the wand for controlling the flow of the high pressure water.

28. (Previously Presented) The cleaning system of claim 24, further comprising a second conduit having an inlet and an outlet, and further wherein the source of high pressure water is connected to the inlet of the first conduit and the source of ozone/water is connected to the inlet of the second conduit.

29. (Previously Presented) The cleaning system of claim 28, further comprising a second discharge nozzle connected to the outlet of the second conduit.

30. (Previously Presented) The cleaning system of claim 29, wherein the first discharge nozzle is positioned to discharge ozone/water along a path that is substantially parallel to a path of the high pressure that is discharged from the first discharge nozzle.

31. (Previously Presented) The cleaning system of claim 29, wherein the first discharge nozzle is positioned to discharge ozone/water along a path that is adjacent to a path of the high pressure that is discharged from the first discharge nozzle.

32. (Previously Presented) The cleaning system of claim 29, wherein the second discharge nozzle substantially concentrically surrounds the first discharge nozzle and discharges an ozone/water stream that substantially concentrically surrounds a high pressure stream that is discharged from the first discharge nozzle.

33. (Previously Presented) The cleaning system of claim 24, wherein the pressure of the high pressure water is greater than about 100 psi.

34. (Previously Presented) A cleaning system, comprising:

a wand having a grip;

a source of ozone/water connected to the wand;

a source of high pressure water connected to the wand;

a means for delivering the high pressure water from the wand to an object to be cleaned; and

a means for delivering the ozone/water from the wand to the object.

35. Withdrawn.

36. Withdrawn.

37. Withdrawn.

38. Withdrawn.

39. Withdrawn.

40. Withdrawn.

41. Withdrawn.
